

ChildrensHospitalLosAngeles-Medical Group

International Leader in Pediatrics

Movement Disorders/Botox Clinic - Division of Neurology
Dr. Terence Sanger

INFORMATION FOR PATIENTS ON FINANCIAL AUTHORIZATION

Welcome to Childrens Hospital Los Angeles. If you are a continuing patient of Dr. Terence Sanger and want to transfer your care to Childrens Hospital Los Angeles, please read the instructions below.

Please take the enclosed Neurology Consultation Intake Form to your primary physician to complete. Have your physician fax the form back to us at the fax number on the form (323 361-1109). You may want to keep a copy of the request for your records.

You will need to have authorization for your child to be seen by Dr. Sanger as a NEW CONSULTATION at Childrens Hospital Los Angeles. (Consult code is 99245).

- If you have an **HMO insurance plan**, your primary physician or your HMO case manager needs to arrange and obtain the authorizations necessary to see Dr. Sanger.
- If you have a **PPO insurance plan**, contact your plan to see if University Childrens Medical Group is a contracted provider. If your plan is not contracted with us, you may be seen, but as an "out of plan" patient, you will incur additional costs.
- If your child has **CCS**, please contact your local CCS coordinator to notify them of Dr. Sanger's move to Childrens Hospital Los Angeles, as they will need to authorize the visits.
- If you are from outside California, please contact your plan to find out if you can be covered at Childrens Hospital Los Angeles and by University Childrens Medical Group.
- If your child is due to receive BoTox® or visits to program and/or refill Baclofen Pump, additional authorizations for these procedures and medications are necessary. Please contact the office if you need further information to arrange authorizations.

Reminder: Requests sent without proper authorization (or PPO insurance information) cannot be processed until the authorization or necessary information is received.
